Basic Skills Committee (BSC)

Agenda
10/7/2011, 9:00-11:00

COMMITTEE FUNCTION:
Purpose is to enhance persistent, organizational progress on the Basic Skills/Immigrant Education Initiative, a major, long-term priority supported by the State Academic Senate and the System Office. Basic Skills instruction impacts large sectors of the college and should involve and integrate all educational programs and services in order to support student equity and success. The committee precursor, the Developmental Education and ESL Task Force has had a sustained District presence since 1982.

The BC committee envisions a district where:
- All students begin their education by taking the basic skills courses they need to succeed in all other coursework and academic endeavors (as per placement).
- All District personnel recognize that the success of basic skills students is a core District priority and that regardless of their position their job is to support them whenever and wherever possible.
- All instructors are deeply aware of the importance of basic skills student success to the college community, understand the unique and varied learning needs, abilities and styles, and possess a flexible repertoire of instructional strategies and techniques to successfully address them.
- Relevant student and instructional support services are available to all basic skills students, especially those whose success depends upon them.
- All basic skills students receive a comprehensive student-centered experience at SRJC that involves both the academic and meta-curriculum to engender structured personal, social and academic development (study skills, goal setting, academic planning, life management, interpersonal and social skills in addition to discipline-specific knowledge and skills).
