ITG – Resolution on Technology Staffing Support – Draft 4.6.2015

Whereas, Santa Rosa Junior College is fully committed to providing a quality educational experience for the entire community and the College has consistently recognized and affirmed that technology is an integral part of fulfilling that vision;

Whereas, Given the greatly expanded the size of our technology base owing to Measure A and the future technology needs that will be funded by Measure H, the new sources of grant funding and increases in Instructional Equipment and Library Materials Funding (IELM) our need for technology support staff has increased;

Whereas, The Institutional Technology Group (ITG) is charged with the responsibility of guiding our technology planning efforts District wide, and in the Technology Master Plan has routinely recognized the need for ongoing technology support to meet the needs of all of our users;

Whereas, There are two programs; Information Technology (IT) and Media Services (MS) that provide the direct support to our technology efforts, and given that the IT & MS programs staffing levels have failed to keep up with the level of current technology and our foreseen future needs; (need staffing level data);

Resolved, that the ITG urges the District to hire additional technical support staff to both programs to address both the current and future needs for technology support and that such action be taken in the upcoming year.
